WORK EXPERIENCE

Center for Digital Experiences at Pratt Institute <i>User Experience Designer</i>	Nov. 2025 – Present <i>New York, NY</i>
- Collaborate on user-centered design projects and interface analysis across 8 client engagements at the Center, including work for Wikimedia Foundation and CardStory. - Design wireframes and prototypes in Figma and Adobe XD, incorporating AI-assisted tools to speed up concept work, and mentor fellow students on Figma fundamentals in the Center's group studio environment. - Translate usability and accessibility findings into interface recommendations, then document design rationale for stakeholders.	
Metropolitan Property Services <i>Property Manager Coordinator</i>	June 2024 – Present <i>Forest Hills, NY</i>
- Manage a portfolio of 30 buildings and 1,035 units across Queens and Manhattan, maintaining an 89% satisfaction rating across 23 Google reviews through structured tenant surveys and concrete service improvements. - Serve as the main point of contact between tenants and vendors, coordinating on maintenance and service requests to resolve issues quickly and efficiently.	
Walmart Global Tech <i>Software Engineer Intern</i>	May 2023 – Jul. 2023 <i>Bentonville, AR</i>
- Coded in Java and C++ on the Cloud-Powered Checkout International team, building and debugging the receipt generation workflow and pushing changes to Git repositories. - Converted XML data into Java to improve cross-system compatibility and data-processing efficiency. - Wrote 5 test cases and caught multiple bugs through software testing and quality assurance, then documented system logic and diagrams for non-technical stakeholders while applying object-oriented design principles. - Used Jira and Slack to track tickets and coordinate with the team, picking up debugging work for other engineers during downtime between project tasks.	

UX / PRODUCT DESIGN PROJECTS

CardStory: Marketplace Feature Design <i>UX Designer & Co-Researcher, 4-person team Pre-launch Pokémon TCG app</i>	2026 (8-week engagement) <i>Remote</i>
- Brought on 2 months before launch after usability testing showed users couldn't find where to buy cards and didn't trust sellers on the platform. Design Delivered: Led end-to-end design of the marketplace feature: a dedicated marketplace tab, structured browsing (Trending, Recommended, New Listings), and trust signals including seller spotlights, verified badges, and price transparency.	
AetherPlay: Browser-Based AR Instrument <i>Interaction Designer, 3-person team Pratt Institute, INFO 680</i>	2026 (6-week build) <i>New York, NY</i>
- Owned gesture detection and hand-tracking (MediaPipe) design for a browser-based AR instrument that turns hand motion into sound and shape with no install required. Design Delivered: Designed and iterated the gesture vocabulary and interaction model across 3 full builds; added a 6-character lobby code for two-player shared play.	
WCAG 2.1/2.2 Accessibility Audit: Wikipedia iOS <i>UX Researcher, 5-person team Client: Wikimedia Foundation</i>	Apr. 2026 – May 2026 <i>New York, NY</i>
- Ran a WCAG 2.1/2.2 audit and cognitive walkthrough of Wikipedia iOS's Liquid Glass redesign, which had shipped to every reader without an accessibility review. Design Delivered: Translated 13 findings into 3 prioritized, engineering-ready design recommendations, delivered in 4 weeks with a stakeholder shareout.	

EDUCATION

Pratt Institute <i>M.S., Information Experience Design (HCI/UX-focused)</i>	Anticipated Graduation Date: May 2028 <i>New York, NY</i>
Southern New Hampshire University <i>B.S., Computer Science</i>	Jan. 2025 <i>Manchester, NH</i>
President's List (Summer, Winter 2022); Honor Roll (multiple terms, 2022–2024)	

CERTIFICATIONS, SKILLS & INTERESTS

- UX/UI Design:** Wireframing, Prototyping, Information Architecture, Interaction Design, Design Systems, UI Style Guides
- Design Tools:** Figma, Adobe XD, Miro, InVision, MediaPipe
- Research Foundations:** Usability Testing, Card Sorting, Tree Testing, Journey Mapping, Persona Development, Heuristic Evaluation
- Programming:** Java, Python, C++, Angular, Node.js, MongoDB, GitHub
